NATIONWIDE DISTRIBUTION

In 2024, Unico partnered with Wesco to be our National Distributor. They are the leading distributor in modular manufacturing with inventory stocked in their distribution centers across the United States. Find your local Wesco representative at www.wesco.com/structures.

THE UNICO SYSTEM

For Modular Structures

Benefits for You

FREE DESIGN SERVICE

If you have a project that needs design assistance, we offer a free service. Our dedicated modular structures design team will provide a PDF system design with an estimated placement for ductwork and outlets. Additionally, a complete design will provide a full material list for your project list for your project.

Benefits for Your Customers

- *Lower Humidity*
- *Superior Energy Efficiency*
- *Improved Indoor Air Quality*
- *Quiet Performance*
- *Draft Free, Even Temperature*
- *Saves Space*

Benefits for Your Business

IN-FACTORY INSTALLATION OF INDOOR COMPONENTS

The Unico System allows for modular manufacturers to install the HVAC system in the factory. The system's sleek mini ducts are small enough to fit in between plumbing, electrical infrastructure, and flooring, where traditional bulky ductwork cannot. The Unico System allows for quick and easy hookup to components on sight.

IN-FACTORY TRAINING

We will provide in-factory training on how to:

- Install The Unico System air-handler
- Install The Unico System SmartDuct™ and supply outlets
- Install add-ons
- Preinstall refrigerant line sets
- Start-up and Commissioning

THE UNICO SYSTEM is a small-duct high-velocity cooling and heating system ideal for any modular structure.

The compact, flexible ductwork and modular air handling units can be integrated into the interstitial spaces between floors and walls in the factory with easy hook-ups to outdoor components on-site.

Installation of The Unico System between the floor joists at Volumetric Building Companies in North Carolina.
